ABDUL MOIEZ

AI & RAG Engineer | Machine Learning Engineer | Data Scientist | Data Engineer
Lahore, Pakistan | +92 3071140091 | abdulmoiez077@gmail.com | LinkedIn | Portfolio | GitHub

SUMMARY

Data Science graduate and AI engineer with strong expertise in machine learning, Generative AI, Retrieval-Augmented Generation (RAG), data engineering, and big data analytics. Hands-on experience building full-stack AI applications and end-to-end ML pipelines in Python and SQL, and evaluating AI agents for accuracy and reliability. Proficient with Microsoft Azure, Databricks, and Snowflake, and skilled in turning complex datasets into actionable insights with Power BI and Tableau. Strong in feature engineering, model evaluation, and explainable AI (SHAP).

SKILLS

Programming: Python, SQL, C++, HTML, CSS
Data Science & AI: Machine Learning, Generative AI, Large Language Models (LLM), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), AI Agent Evaluation, Data Analysis, Data Engineering, ETL Pipelines, Big Data Analytics, Predictive Modeling, Model Evaluation
Machine Learning: Linear Regression, Random Forest, XGBoost, LightGBM, Classification, Scikit-learn, Feature Engineering, Explainable AI (SHAP)
Visualization & BI: Power BI, Tableau, Data Visualization, Business Intelligence
Cloud & Platforms: Microsoft Azure, Azure Databricks, Snowflake
Tools & Technologies: Streamlit, FastAPI, REST APIs, React, PostgreSQL, ChromaDB (Vector Database), Microsoft Office

PROFESSIONAL EXPERIENCE

AI Agent Evaluation & Quality Analyst — Hubble42 Inc. | Sep 2026 – Oct 2026 | Lahore
- Evaluated and benchmarked AI agents against defined quality standards, validating outputs for accuracy and reliability.
- Identified performance issues in AI agent behavior and resolved failed evaluation criteria.
- Performed quality analysis on agent outputs to ensure reliable and accurate task completion.

PROJECTS

VoigerAI — AI-Powered Travel Planning System
- Architected and built a full-stack RAG application using FastAPI and React, integrating PostgreSQL, ChromaDB vector database, and Groq AI LLM to generate personalized, context-aware trip plans.
- Delivered intelligent budgeting, accommodation selection, and route optimization by combining retrieval-augmented generation with live, open data APIs.

RAG-Based Student Career Assistant
- Built an AI assistant using Retrieval-Augmented Generation to deliver personalized, context-grounded career guidance.
- Applied machine learning techniques to tune retrieval relevance, improving recommendation accuracy and user interaction quality.

Customer Churn Prediction System
- Developed a customer churn prediction system using Random Forest, XGBoost, and LightGBM with feature engineering (tenure groups, service usage).
- Built a complete Scikit-learn pipeline using Pipeline and ColumnTransformer for preprocessing and model evaluation.
- Applied SHAP explainability to identify key churn drivers and target high-risk customers for retention.

EDUCATION

BS in Data Science, University of Central Punjab — 2026
Intermediate in Computer Science (ICS), Punjab Group of Colleges — 2021
Matriculation, Computer Science, Vesper School System — 2019

CERTIFICATIONS

- Web Designing & Development, NAVTTC, 2022
- Microsoft Office Specialist (Word 2016), Microsoft, 2021
